1 Day Tour Filfill - Asmara

Day 1: Asmara - Semenawi Bahri - 08:00 - 17:00

This is the area found to the North-East of Asmara commonly referred to as "The Green Belt". It is permanently green, covered with forest and plantations. Halfway down the escarpment we find grass on the road even in the dry season, which must make this area almost unique in the country. The elevation is between 900 - 2400 mts.

Wildlife species are not found in big numbers but the occurrence of leopard, bushbuck, klipspringer, greater kudu, duiker and warthog and a number of bird species, has been ascertained recently. The numbers of Erkel's Francolins is quite amazing in the Semenawi Bahri.

30 minutes walk from Meguo to Aba Añre
